5. NEW BUSINESS
 - a. Utility Commission Recommendation, Modifying The Formula For Calculating Future Utility Payments In Lieu Of Taxes (PILOT). DISCUSSION: Barry Sorenson outlined a Commission proposal to modify the formula linking it to annual utility revenue rather than the current value of plant. It was noted that the annual payment in lieu of taxes is paid by the Utility to the General Fund. Sorenson said 72,000 feet of water system exist; maintaining is financial challenging, leading to borrowing. He said the proposal was not to freeze, but was to slow it down payment growth. Thompson asked for more details about the non-freeze proposal. Thomas said treatment plant costs were a concern and well as anticipated electrical system improvements. Hansen said TID #1 had already stepped-up to benefit the Water System by paying more than \$1,000,000 for STH 19 water system improvements. He said with the current PILOT formula it amounted to an interest free loan, but with the proposed change, the General Fund would not be able to recoup any dollars over time. Bisco said PILOT represents a sizable percentage of the Water Utility costs. Sorenson said action was needed. Springer said no easy answers were available and asked for further work on the matter. MOTION: Moved by Quimby, seconded by Griffin to table the matter until a future time. VOICE VOTE: Motion carried.
