Dear Jason Butzine,

ARV is proud to represent AEV Ambulances- one of the safest and most durable ambulances in production today. From the drawing board to the laboratory and finally, to the road, AEV is the most tested and most proven ambulance on the market today. With a multi-decade history of safety testing, every facet of an AEV ambulance is designed for one purpose, to keep your crew safe. AEV is the largest manufacturer in the industry, producing an average of 1,500 units every year. As a result of this success, they have innovated and refined their ambulance body far more than most other manufacturers. Their reliability, low cost of ownership, and proven safety are the reason they are the most chosen brand across the nation for the most critical mission assignments. AEV has a decades long history of Dynamic Crash Testing, with several innovations coming from their testing program. Today- AEV is still the only manufacturer to have conducted double destructive impact dynamic testing. Unlike most manufacturers who stop at the minimum industry standards, AEV sets all their test requirements to a minimum 27% higher, and often will push for the highest possible test forces. For the roof and side static load testing, AEV exceeds other brands by over 40%!

Being the largest ambulance manufacturer in the US also means AEV builds one of the most dependable and sought-after vehicles in the market. Because of their dedication to detail and reliability, AEV has one of the lowest costs of ownership in the industry. AEV's are designed to stay in service longer, require less maintenance, and be easier to service than any other brand. Finally, AEV ambulances are built in the USA by men and women who take pride in their work. From AEV's current 400,000 sq. ft. campus with state-of-the-art Paint Booths, Laser Routers, and Lean Certified Production, you can trust that AEV will not only meet but exceed your expectations. All AEV Ambulances come with industry leading warranties in all areas of the vehicle, a true testament to the reliability of the body!

American Response Vehicles (ARV) is a locally owned Missouri Small Business. We are proud to be one of the largest ambulance dealerships in the Mid-West, representing AEV in 8 states! With over 200 years combined of sales and service experience, you can be assured that American Response Vehicles is the right choice for partnership with your agency. We are proud to offer service at our facilities in Columbia, Madison, Omaha, Chicago, or on-site at your location. Our focus at ARV is service after the sale, ensuring your vehicle is on the road and supporting your area as best as possible. Our dealership also offers many other services such as New and Used vehicles, Remounts, Graphics, Repair, Installations, and more! With hundreds of satisfied customers and counting, we here at American Response Vehicles look forward to working with you!

All AEV ambulances are built to exceed the requirements of the F.M.V.S.S. and KKK-A-1822-F, and can be built in line with CAAS and NFPA standards as well. All AEV ambulances are built on ambulance prep chassis. AEV is Ford QVM Certified and a member of the NTEA. All vehicles are built to meet and exceed all national standards and certifications.

PRICING NOTE

We are experiencing unprecedented shortages and pricing increases in our industry. Many competitors are not holding the quoted price through to final delivery, which in most cases is two years after receipt of sales agreement. That being said- ARV is very proud to honor all pricing from date of quote to final delivery. There is a 60 day price quote window which starts the day you receive this proposal. After 60 days we do need to requote. Once a sales agreement/Purchase Order is signed, the price is locked and will match the final invoice. The customer reserves the right to make changes to the design up to Order Confirmation, which occurs when Ford commits to a VIN number and delivery date of the chassis.

Additionally- ARV does NOT require any down payment funds to initiate the order. Terms are 100% net at final delivery.

Finally- if desired, ARV does have several financing options, including a bank dedicated to working with AEV which provides highly competitive rates. We are happy to provide the contact information to you if you are interested.

Replacement ambulance

Showing its age

- Extremely rough ride
- Very noisy patient compartment
- Increased maintenance and cost
- Fewer drivers
- Increased call volume leads to higher mileage and increased maintenance costs

Outgoing ambulance is over 17 years old.

Benefits of an updated chassis type

- Increased ride comfort for patients and crew due to liquid springs
- Better handling
- More members would feel comfortable driving
- 4-wheel drive for enhanced handling in adverse conditions
- Ford chassis is less expensive to maintain than a Freightliner chassis

Rendering only. Not the actual truck.

The Vendor

- American Response Vehicles can be locally serviced in DeForest, WI
- Custom-built to suit the needs of our community

Lifecycle plan for the new ambulance

Reasons to upgrade to the more expensive X-Body construction:

- Recessed ceiling fixtures results in fewer head injuries to crew
- Long life expectancy allows for a remount later in life if needed
- Includes sound deadening insulation for a quieter patient compartment
- Higher crash test ratings
- Durability

Our plan:

- We expect this new configuration to last us 15-20 years. After 15-20 years, this upgraded box could last another 15-20 years on a new chassis between the years 2040-2045. Doing a "remount" between 2040-2045 would be half the price of replacing the entire ambulance at that time. The upgraded construction of this ambulance box will have lower maintenance costs over its lifespan.

We need to act now

- An order placed before November 20th, 2022, will be price-locked until time of delivery (estimated January 2025). The price for this ambulance through American Response Vehicles will not increase if we order now.
- Lead times are 18-24 months between time of order and delivery
