PUBLIC NOTICE OF A COMMITTEE MEETING OF THE CITY OF WATERLOO COMMON COUNCIL

Pursuant to Section 19.84 Wisconsin Statutes, notice is hereby given to the public and news media, that a public meeting will be held to consider the following:

COMMITTEE: FINANCE, INSURANCE & PERSONNEL COMMITTEE
DATE: May 16, 2024
TIME: 6:00 pm
LOCATION: Municipal Building Council Chamber, 136 N. Monroe Street

- 1) CALL TO ORDER AND ROLL CALL
- 2) APPROVAL OF MEETING MINUTES: April 18, 2024.
- 3) PUBLIC COMMENT
- 4) PRESENTATION
 - a) Ehlers – Discussion regarding Financial Plan Management Services
- 5) NEW BUSINESS
 - a) March 2024 Financial Statements: Payroll \$86,079.71, General Disbursements \$431,537.02 and Clerk/Treasurer's Reports [see on municipal website](#)
 - b) Police Department Furnace quote from Jensen
 - c) Waterloo Water & Light TIF dollars from TID #5
 - d) Hiring Process
 - e) Speed Board Display for Police
- 6) FUTURE AGENDA ITEMS AND ANNOUNCEMENTS
- 7) ADJOURNMENT

Jeanne Ritter
Clerk/ Deputy Treasurer

Committee Members: Thomas, Weihert and Kuhl

Posted, Emailed & Distributed: 05/10/2024

PLEASE NOTE: It is possible that members of and possibly a quorum of members of other governmental bodies of the municipality may attend the above meeting(s) to gather information. No action will be taken by any governmental body other than that specifically noted. Also, upon reasonable notice, efforts will be made to accommodate the needs of disabled individuals through appropriate aids and services. For additional information or to request such services please contact the clerk's office at the above location.

CITY OF WATERLOO FINANCE, INSURANCE & PERSONNEL COMMITTEE: MEETING MINUTES

April 19, 2024

[a digital recording of this meeting also serves as the official record]

- 1) CALL TO ORDER AND ROLL CALL. Thomas called the meeting to order at 5:30 p.m. Members in person: Thomas, Weihert and Kuhl. Remote: none. Absent: none. Others attending in person or remote: Mayor Quimby; Treasurer Nelson; Chief W. Benisch; Police Chief D. Sorenson; DPW Supervisor C. Yerges; K. Hering, M. Petrie, J. Butzine, Jenifer Zimmermann and Clerk Ritter.
- 2) APPROVAL OF MEETING MINUTES: March 21, 2024. Motion [Kuhl/Weihert] VOICE VOTE: Motion carried.
- 3) PUBLIC COMMENT (3 Minute Time Limit) none
- 4) NEW BUSINESS
 - a) Bylaws Discussion with the Fire Dept. Discussion will take back changes to membership.
 - b) Town of Waterloo Radio Payment Update informational.
 - c) March 2024 Financial Statements: Payroll \$88,327.18, General Disbursements \$240,977.91 and Clerk/Treasurer's Reports[[see on municipal website](#)] [Kuhl/Weihert] VOICE VOTE: Motion carried.
 - d) 2023 Audit Review Discussion – informational.
 - e) Correction on Hawthorn and Stone Guaranteed TIF Revenue - informational.
 - f) 2024-04 Resolution 2023 Financial Carry-Over Approvals [Kuhl/Weihert] VOICE VOTE: Motion carried.
 - g) Discussion on Plan-It Software fee increase – looking over options.
 - h) ARPA Funds Discussion.
 - i) Ordinance 53-8 update. Send to Attorney regarding ordinance vs. policy.
- 5) ADJOURNMENT. MOTION: [Kuhl/Thomas] To adjourn. VOICE VOTE: Motion carried. Approximate time 6:42pm.

Jeanne Ritter
Clerk/Deputy Treasurer

Lana Nelson, City Treasurer/Deputy Clerk
City of Waterloo, Wisconsin
136 N Monroe St
Waterloo, WI 53594

**Re: Written Municipal Advisor Client Disclosure with the City of Waterloo (“Client”) for 2024
Financial Management Plan (“Project” Pursuant to MSRB Rule G-42)**

Dear Lana:

As a registered Municipal Advisor, we are required by Municipal Securities Rulemaking Board (MSRB) Rules to provide you with certain written information and disclosures prior to, upon or promptly, after the establishment of a municipal advisory relationship as defined in Securities and Exchange Act Rule 15Ba1-1. To establish our engagement as your Municipal Advisor, we must inform you that:

1. When providing advice, we are required to act in a fiduciary capacity, which includes a duty of loyalty and a duty of care. This means we are required to act solely in your best interest.
2. We have an obligation to fully and fairly disclose to you in writing all material actual or potential conflicts of interest that might impair our ability to render unbiased and competent advice to you. We are providing these and other required disclosures in **Appendix A** attached hereto.

As your Municipal Advisor, Ehlers shall provide this advice and service at such fees, as described within **Appendix B** attached hereto.

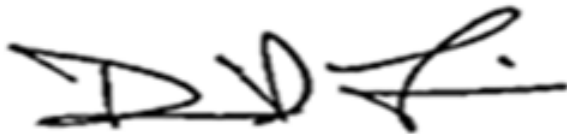

This documentation and all appendices hereto shall be effective as of its date unless otherwise terminated by either party upon 30 days written notice to the other party.

During the term of our municipal advisory relationship, this writing might be amended or supplemented to reflect any material change or additions.

We look forward to working with you on this Project.

Sincerely,

Ehlers & Associates

A handwritten signature in black ink, appearing to read 'D. Ferris', is written over a horizontal line.

David Ferris, CPA
Senior Municipal Advisor

¹ This document is intended to satisfy the requirements of MSRB Rule G-42(b) and Rule G-42(c).

Appendix A

DISCLOSURE OF CONFLICTS OF INTEREST/OTHER REQUIRED INFORMATION

Actual/Potential Material Conflicts of Interest

Ehlers has no known actual or potential material conflicts of interest that might impair its ability either to render unbiased and competent advice or to fulfill its fiduciary duty to Client.

Other Engagements or Relationships Impairing Ability to Provide Advice

Ehlers is not aware of any other engagement or relationship Ehlers has that might impair Ehlers' ability to either render unbiased and competent advice to or to fulfill its fiduciary duty to Client.

Affiliated Entities

Ehlers offers related services through two affiliates of Ehlers, Bond Trust Service Corporation (BTSC) and Ehlers Investment Partners (EIP). BTSC provides paying agent services while Ehlers Investment Partners (EIP) provides investment related services and bidding agent service. Ehlers and these affiliates do not share fees. If either service is needed in conjunction with an Ehlers municipal advisory engagement, Client will be asked whether or not they wish to retain either affiliate to provide service. If BTSC or EIP are retained to provide service, a separate agreement with that affiliate will be provided for Client's consideration and approval.

Solicitors/Payments Made to Obtain/Retain Client Business

Ehlers does not use solicitors to secure municipal engagements; nor does it make direct or indirect payments to obtain or retain Client business.

Payments from Third Parties

Ehlers does not receive any direct or indirect payments from third parties to enlist Ehlers recommendation to the Client of its services, any municipal securities transaction or any financial product.

Payments/Fee-splitting Arrangements

Ehlers does not share fees with any other parties and any provider of investments or services to the Client. However, within a joint proposal with other professional service providers, Ehlers could be the contracting party or be a subcontractor to the contracting party resulting in a fee splitting arrangement. In such cases, the fee due Ehlers will be identified in a Municipal Advisor writing and no other fees will be paid to Ehlers from any of the other participating professionals in the joint proposal.

Municipal Advisor Registration

Ehlers is registered with the Securities and Exchange Commission (SEC) and Municipal Securities Rulemaking Board (MSRB).

Material Legal or Disciplinary Events

Neither Ehlers nor any of its officers or municipal advisors have been involved in any legal or disciplinary events reported on Form MA or MA-I nor are there any other material legal or disciplinary events to be reported. Ehlers' application for permanent registration as a Municipal Advisor with the (SEC) was granted on July 28, 2014 and contained the information prescribed under Section 15B(a)(2) of the Securities and Exchange Act of 1934 and rules thereunder. It did not list any information on legal or disciplinary disclosures.

Client may access Ehlers' most recent Form MA and each most recent Form MA-I by searching the Securities and Exchange Commission's EDGAR system (currently available at <http://www.sec.gov/edgar/searchedgar/companysearch.html>) and searching under either our Company Name (Ehlers & Associates, Inc.) or by using the currently available "Fast Search" function and entering our CIK number (0001604197).

Ehlers has not made any material changes to Form MA or Form MA-I since that date.

Conflicts Arising from Compensation Contingent on the Size or Closing of Any Transaction

The forms of compensation for municipal advisors vary according to the nature of the engagement and requirements of the client. Compensation contingent on the size of the transaction presents a conflict of interest because the advisor may have an incentive to advise the client to increase the size of the securities issue for the purpose of increasing the advisor's compensation. Compensation contingent on the closing of the transaction presents a conflict because the advisor may have an incentive to recommend unnecessary financings or recommend financings that are disadvantageous to the client. If the transaction is to be delayed or fail to close, an advisor may have an incentive to discourage a full consideration of such facts and circumstances, or to discourage consideration of alternatives that may result in the cancellation of the financing or other transaction.

Any form of compensation due a Municipal Advisor will likely present specific conflict of interests with the Client. If a Client is concerned about the conflict arising from Municipal Advisor compensation contingent on size and/or closing of their transaction, Ehlers is willing to discuss and provide another form of Municipal Advisor compensation. The Client must notify Ehlers in writing of this request within 10 days of receipt of this Municipal Advisor writing.

MSRB Contact Information

The website address of the MSRB is www.msrb.org. Posted on the MSRB website is a municipal advisory client brochure that describes the protections that may be provided by MSRB rules and how to file a complaint with the financial regulatory authorities.

Appendix B

Scope of Service

Client has requested that Ehlers & Associates to prepare a Financial Management Plan (“Project”). Ehlers & Associates proposes and agrees to provide the following scope of services:

Confirm Planning Objectives

- Prior to commencing the work, we will review our approach with Client staff to ensure that we have a full understanding of the Client’s objectives, any areas of concern or focus, and desired process outcomes. If necessary, we can modify our Scope of Services to meet specific Client needs.

Gather Required Information

- To complete our work, we will need to gather certain information which may include prior year audits and budgets (generally five years); current year budget; capital improvement plans; existing debt service schedules and allocations; strategic planning documents; staffing plans; and policies pertaining to fund balance, debt management; post-issuance compliance and financial management (Ehlers & Associates may already have some or all this information on file).

Prepare Financial Model

- Based on the Client’s objectives and the information available, we will prepare a Client-specific Excel based financial planning model that includes:
 - **Credit Profile Evaluation.** An assessment of selected financial, debt and demographic indicators will be prepared comparing Client to the Statewide median indicators for its rating peer group, and to other governmental entities of comparable size or location. If applicable, the assessment will also include a comparison with the medians of the next higher rating classification and to representative governmental entities in that class. Analysis will be provided to identify areas of strength and potential weakness in the Client’s credit profile.
 - **Valuation Forecast.** We will project growth in equalized value based on historical valuation trends, and anticipated potential for and timing of new development based on Client input. If applicable, “TID IN” and “TID OUT” forecasts will be provided. The impact of TID closure will be considered based on Client direction. One or more potential growth scenarios may be modeled based on Client’s objectives.

- **Fund Forecasts.** We will forecast revenues and expenditures for the following funds based on prior year budgetary trends. Based on the Client's objectives and the information available to us, one or more alternate fund forecasts may be developed to reflect adjustments to service levels and staffing. All other levy funds will be included in the overall tax levy charts. Detail analysis will occur for the following funds:
 - General Fund
 - Debt Service Fund
 - Capital Improvement Fund
- **Capital Planning Model.** Using Client's capital improvement plans, we will prepare one or more models identifying funding sources for identified projects. Fund balances, tax levy, debt proceeds, and annual revenues will be evaluated as funding sources.
- **Debt Model.** We will prepare a current debt service schedule including projected debt abatement sources and tax levy requirements. To the extent that debt financing is required for capital improvement projects, the projected impact of that financing will be modeled. The model will also forecast debt limit capacity utilization and the projected impact of future debt obligations on selected debt profile indicators (for General Obligation debt).
- **Consolidated Tax Levy and Rate Projection Model.** A summary forecast will be provided projecting the future tax levy that would be required to support the General Fund, Capital Projects Fund, Debt Service Fund, and other levy supported funds. Based on the valuation projection model, a forecasted equalized tax rate will be provided. Future levy requirements will be tested against applicable levy and rate limits. A similar summary forecast will be provided for any enterprise funds included in the model and will include a projection of any additional revenue requirements needed to support the forecast.

Conduct Governing Body Workshops

- Workshops will be conducted concurrent with development of the financial model. The number of workshops will depend upon the City's needs. Two workshops are included in this quote. The purpose of the workshops will be to present key data, observations, findings, alternatives, and recommendations, and to seek input of Governing Body members and key staff at periodic intervals before the model is finalized. Specific workshop dates, and the points at which they occur in the process, will be established in consultation with the Client based on the objectives of Client, the availability of the Governing Body and key staff, and the availability of information needed to complete the plan. Workshops are generally more effective when held independent of other Governing Body meetings.

Final Report

- Following completion of the model and workshops, we will prepare a PowerPoint summary report that includes and explains all primary elements of the forecast model. The report will include a summary of key observations and recommendations. If applicable, we will recommend modifications to existing Client policies pertaining to fund balance, debt management, post-issuance compliance and financial management.

Compensation

In return for the services set forth in the “Scope of Service,” Client agrees to compensate Ehlers & Associates in the amount of \$15,000. Additional workshops, above the meetings included in the proposal above, will be charged on an hourly basis at \$250 per hour.

For an ala cart menu for this service, the service can be broken down into the following parts:

_____	General operating projections	\$5,000
_____	Debt/Capital Planning	\$5,000
_____	Tax Increment District Projections	\$5,000

For any service directed by Client and not covered by this, or another applicable Appendix, Ehlers & Associates will bill Client at an hourly rate that is dependent upon the task/staff required to meet Client request at no less than \$125.00/hour and not to exceed \$350.00/hour.

Payment for Services

For all compensation due to Ehlers & Associates, we will invoice Client for the amount due at the completion of the work. Our fees include our normal travel, printing, computer services, and mail/delivery charges. The invoice is due and payable upon receipt by the Client.

SECTION 1 – BACKGROUND

In November of 2020, Ehlers & Associates was engaged by the Village to prepare a comprehensive Five-Year Financial Management Plan to guide future financial decisions. For the 2022 plan update, the Village decided to expand the plan to a Ten-Year Financial Management Plan as there are several large projects on the horizon for the Village. This document should be used by the Village as a road map to determine how the Village can accomplish its goals while staying fiscally responsible. This document summarizes the results of that planning effort and is intended to be used as an analytical framework for making future decisions with respect to levels and timing of supportable debt financing. Because conditions can change rapidly, and assumptions may or may not be borne out over time, it is recommended that this plan be updated annually or at other key times prior to making long-term financing commitments.

SECTION 2 – PROCESS

Development and refinement of the ten-year financial plan model was completed with staff over a number of weeks to be able to bring it to the Village Board for a presentation on September 12, 2022. As a part of the presentation, Village officials were briefed on the current status of the Village’s financial position; historical and projected valuation trends; capital financing alternatives; tax rate projections for operating, capital and debt service expenditures; and cash flow projections for Tax Incremental District No. 3, 4 and 5.

SECTION 3 – CURRENT FINANCIAL POSITION

As part of the planning process, the current financial position of the Village was reviewed. This review included an analysis of current general obligation debt structure, and a comparison of credit and financial indicators of the Village to statewide medians and to selected communities in Wisconsin with similar demographics in terms of location or size.

3.1 General Obligation (G.O.) Debt Schedule (Base Case)

Table 1 provides a schedule of existing Village G.O. debt and associated payments. G.O. debt is secured by the “full faith and credit” of the issuer, meaning the Village has an irrevocable duty to levy annually a property tax in an amount sufficient to ensure timely repayment of the debt. While the debt is ultimately secured by the ability to levy a property tax, the Village can, and does, abate portions of the levy with other sources of revenue available for debt payments. These other sources of revenue include:

- Tax increments from Tax Incremental Districts No. 3, 4 & 5 (“TID 3, 4 or 5”)
- User fees from the operation of the Village’s Sewer Utility

- User fees from the operation of the Village's Water Utility
- Amounts received from the Townships for Fire capital,
- Impact fee collections, and
- Funds on hand

Collectively, these non-property tax revenue sources are expected to repay 29.6% of the scheduled debt service of all Village G.O. debt issued as of January 1, 2023. Future tax increment collections from TID 3, TID 4 and TID 5 comprise the largest single source of this non-property tax revenue, reflecting an allocation of 14.76% of all current Village G.O. debt service to TIF eligible project costs. However, due to TID cash flow issues, the Village contemplates providing future tax levy support of approximately \$1.5 million for TID 3, 4 and 5. For the current 2022 budget year, existing debt service not paid from other sources is equivalent to a tax rate of \$1.57 per \$1,000 of equalized property value.

Wisconsin State Statues limit the amount of G.O. debt principal that a community may have outstanding to 5% of its equalized value (including the value of any tax increments). The Village's equalized value as of January 1, 2022 was \$1,587,674,000 with a corresponding debt principal limit of \$70,588,89. The Village's outstanding debt principal as of December 31, 2022 will be \$35,090,129 which is 44.2% of the limit.

Table 1

Existing Debt Service Sources of Repayment and Levy Impact Analysis (Base Case)																					
YEAR	Debt Service			Abatement Sources							Projected Rate Impact										
	General Obligation Debt	Other Debt Service Fees	Total of All Obligations	TID 3	TID 3 Covered by Tax Levy	TID 4	TID 4 Covered by Tax Levy	TID 5	TID 5 Covered by Tax Levy	Water Utility	Sewer Utility	Impact Fees	Interest Income / Misc Diff	Fund Balance Applied	Total Abatement Sources	Net Debt Service Levy	Levy Change	Projected Equalized Value	% Change	Debt Service Tax Rate	YEAR9

NOTES:

3.2 Financial Indicators

Investors in municipal bonds and other forms of public debt may rely on ratings assigned by credit rating services as one determinant in judging the risk of a particular investment. As such, an issuer’s rating affects the price and interest rate that will be paid when debt is issued. Bond ratings are provided, for a fee, by firms such as Moody’s Investors Service, Standard & Poor’s, and Fitch Ratings. **Table 2**, found below, defines the rating codes used by Moody’s Investors Service and Standard & Poor’s in evaluation of “Investment Grade” securities.

Table 2
Bond Ratings and Description

Moody's	S&P	Rating Description
Aaa	AAA	Highest rating assigned. The obligor’s capacity to meet its financial commitment on the obligation is EXTREMELY STRONG
Aa1	AA+	Differs from the highest rated obligations only in small degree. The obligor’s capacity to meet its financial commitment on the obligation is VERY STRONG
Aa2	AA	
Aa3	AA-	
A1	A+	Is somewhat more susceptible to the adverse affects of changes in circumstances and economic conditions than obligations in higher rated categories. The obligor’s capacity to meet financial commitment on the obligation is still STRONG
A2	A	
A3	A-	
Baa1	BBB+	Exhibits ADEQUATE protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation
Baa2	BBB	
Baa3	BBB-	

The Village is currently rated Aa2 with Moody’s Investor Services, however, the typical financial indicators that are used by the rating agencies to determine credit quality are useful when gauging the financial position of a community. In assigning a rating to a bond, credit rating services examine various measures designed to assess the debt issuer’s financial condition. Local governments can calculate these same measures for themselves and use them as the basis for self-evaluation, and in the development of formal or informal financial management policies. Typical financial indicators, as described in Moody’s **US Local Government General Obligation Debt** document, include:

Economy/Tax Base (30%)

- **Tax Base Size of Community** – One of the most significant factors considered by credit rating services is the total value of all taxable property in the community. The size of a community's tax base is a reflection of its ability to pay, and accordingly, its creditworthiness. An additional qualitative indicator is the composition of the local tax base. A diverse property tax base of residential, commercial and industrial land uses that is not concentrated in a particular segment of the economy or in several large employers is considered more resilient to economic fluctuations.
- **Full Value Per Capita** – Full value per capita scales the taxable property available to generate resources to a per resident metric. The per resident property wealth of the tax base depicts the availability of tax-generating resources relative to the users of the services those resources fund
- **Median Family Income** – An important measure of the strength and resilience of a tax base is the income level of its residents. A community with higher wealth levels may have relative flexibility to increase property tax rates in order to meet financial needs. A wealthier community has greater spending power to sustain sales tax revenue and provide the demand necessary to support growth in the commercial and service sectors.

Finances (30%)

- **Fund Balance** – Fund balance describes the net financial resources available to an entity in the short term. The fund balance communicates valuable information about both the past and the future. The existing balance depicts the cumulative effects of the local government's financial history. It also identifies the liquid resources available to fund unforeseen contingencies as well as likely future liabilities.
- **5-Year Dollar Change in Fund Balance as % of Revenues** – The strength of local government financial operations encompasses many elements, some of which interact: whether (and how much of) reserves are appropriated into the budget, how conservative the budget projections are, and how management reacts midcourse to variances from the original assumptions. The most important aspect of financial operations is the local government's ability to achieve structural balance: long-term revenues matching long-term spending. The focus here is on whether financial reserves are increasing in step with budgetary growth. The five-year window is generally representative of a full economic cycle.
- **Cash Balance** – Cash (net of notes payable within one year) represents the paramount liquid resource without regard to accruals. This approach mutes some of the effects of modified accrual accounting while still recognizing the non-cash resources that are nonetheless likely accessible in the near-term.
- **5-Year Dollar Change in Cash Balance as % of Revenues** – This factor seeks to reflect changes to a local government's cash position distinct from its fund balance. Accrual accounting can sometimes depict a story that obscures some details of financial operations. The trend in the local government's cash balance gives us additional information about financial operations that may be veiled by accrual-driven changes in fund balance

Management (20%)

- **Institutional Framework** – This factor measures the municipality’s legal ability to match revenues with expenditures based on its institutional apparatus: the constitutionally and legislatively conferred powers and responsibilities of the local government entity. Factors that drive this factor include levy limits, organized labor, predictability of costs and Tax Increment Financing. All Wisconsin municipalities receive an A rating on this factor.
- **Operating History** – The five-year operating history shows whether the local government’s financial position is strengthening or weakening, and whether management has been effective at planning for the future and adjusting when things have not gone as planned. While institutional framework communicates the context of a municipality’s legal ability to match revenues and spending, the operating history communicates the local government’s demonstrated willingness to utilize that ability.

Debt/Pensions (20%)

- **Debt to Full value** – This metric shows how onerous future debt service payments could be to the tax base. Full value is used as a proxy for the capacity of a local government to generate additional revenues to pay debt service.
- **Debt to Revenues** – This metric expresses the potential budgetary impact of future debt service. A high debt burden relative to operating revenues implies a possibility that debt will consume a greater portion of the local government’s budget in future years.
- **3-year Average of Moody’s-Adjusted Net Pension Liability to Full Value** – This factor measures the magnitude of a local government’s pension obligations (as adjusted by Moody’s) relative to its tax base. Similar to the debt burden evaluation, the tax base is used as a proxy for future revenue-generating capacity to amortize accrued pension obligations for which trust assets are not currently set aside. The three-year average is used to smooth the volatility inherent in a metric that changes with market interest rates and the value of pension plan assets.
- **3-year Average of Moody’s-Adjusted Net Pension Liability to Operating Revenues** – This metric seeks to measure pension obligations relative to the size of the local government’s budget and attempts to reflect the prospect that amortization of accrued net pension obligations could sap revenues out of future-year budgets and lead to funding shortfalls. Because pension contributions are for many governments a significant fixed-cost share of what is already typically the largest component of general government operations – salaries and benefits – they directly affect annual budgets and the ability to sustain essential services.

Table 3 reflects the Village’s most recent Moody’s scorecard, which utilizes the 2020 audited financial statements as the 2021 financial statements were not available as of the date the Village borrowed for projects in 2022. The table shows how the Village scored on each of the rating metrics.

Comparison of 2022 rating to the 2021 rating:

- Finances
 - Fund balance as a % of revenues increased from Aa to Aaa
 - Five-year fund balance trend increased from A to Aa
- Debt and Pensions
 - Moody’s 3-Year net pension liability to full value decreased from Aaa to Aa. This is a calculation that Moody’s prepares regarding the retirement system.

The Village maintained its’ Aa2 rating which is a Very Strong rating, as defined by Moody’s rating table included on page 5 of this document.

Table 3
Village of Oregon Moody’s Scorecard

Rating Factors	Measure	Score
Economy/Tax Base (30%)[1]		
Tax Base Size: Full Value (in 000s)	\$1,312,188	A
Full Value Per Capita	\$126,745	Aa
Median Family Income (% of US Median)	142.1%	Aa
Finances (30%)		
Fund Balance as a % of Revenues	35.3%	Aaa
5-Year Dollar Change in Fund Balance as % of Revenues	11.6%	Aa
Cash Balance as a % of Revenues	77.8%	Aaa
5-Year Dollar Change in Cash Balance as % of Revenues	50.4%	Aaa
Management (20%)		
Institutional Framework	A	A
Operating History: 5-Year Average of Operating Revenues / Operating Expenditures	1.0x	A
Debt and Pensions (20%)		
Net Direct Debt / Full Value (%)	2.3%	A
Net Direct Debt / Operating Revenues (x)	3.9x	Baa
3-Year Average of Moody’s Adjusted Net Pension Liability / Full Value (%)	0.7%	Aa
3-Year Average of Moody’s Adjusted Net Pension Liability / Operating Revenues (x)	1.1x	A
	Scorecard-Indicated Outcome	Aa2
	Assigned Rating	Aa2

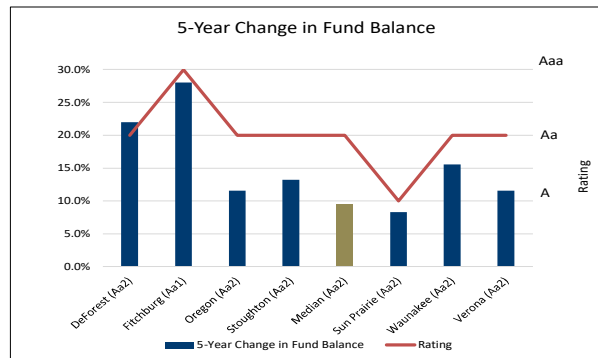

The charts on the following pages reflect the Moody’s factors for the Village based on the most recent scorecard. These factors are compared to median “Aa2” averages as provided by Moody’s, and to various cities and villages in the surrounding area where information was available.

Economy

Finances

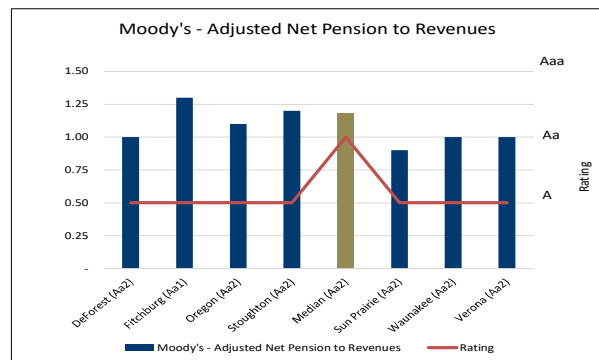

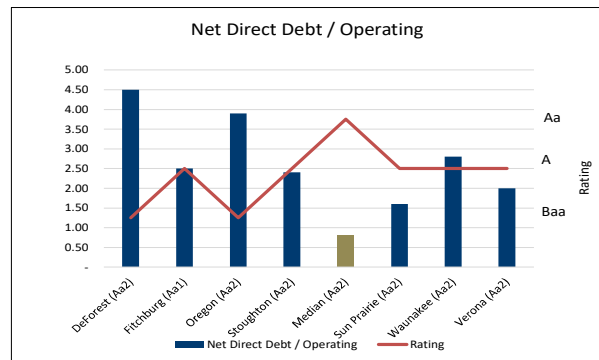

Management

Debt and Pensions

The analysis presented in this Section provides one way in which to benchmark the financial health of the community. Using annual financial results, these numbers, like the balance of the financial plan, can be updated to reflect both historical trends and future projections. As a part of this planning process, the Village Board should discuss development of formal financial management policies that establish targeted ranges for debt burden, debt per capita, and percent of expenditures for debt service. While the Village can develop policies or guidelines designed to control some of the measures discussed in this section, other variables, such as growth rates, personal income levels, and debt plans of other overlapping taxing entities are largely outside of the ability of the Village Board to influence or control.

SECTION 4 – FINANCIAL PLAN DATA TABLES

4.1 Equalized Value

Projection of the tax rate impact of operating, capital and debt expenditures over time requires that assumptions be made as to the pattern of future growth in the Village. Projections developed for the Village’s financial model utilize equalized (fair market) values, which provide for more accurate forecasting by eliminating the need to account for changes in assessment ratios and revaluation. During the period from 2018 through 2022, Village equalized value increased by an average of 7.86% per year. This average includes value increases that occurred within the Village’s TIDs (see [Table 4](#)).

Based on historical value trends, a model was developed to forecast future valuation growth for purposes of projecting tax rate impact. The model (see [Table 4](#)) projects values using three techniques: 1) an assumption that TID OUT and TID IN values will continue to increase year over year based on historical indications; 2) an assumption that TID IN values will increase by 2.00% to reflect economic changes and new construction. This method is the most conservative as it projects that the Village will grow at a slower rate than it has over the past five years.

Table 4

Equalized Value Historical and Growth Projections						
	TID Out			TID In		
	Projected Total Value			Projected Total Value		Net New Construction ¹
	Valuation		Percent		Percent	Percent
	Year	Equalized Value	Change	Equalized Value	Change	Change
Historical	5 year trend		7.86%	7.91%		2.60%

	2031	1,834,893,382	2.00%	1,897,417,399	2.00%	2.00%
Notes:						
¹ Includes changes to improvement values due to construction of new buildings less demolition.						

4.2 Operating Budget Projections

Projecting out future operating costs is an important part of the financial management plan. Determining where pressures lie in the Village's operations is needed to plan for future budgets. The forecast demonstrates an average operating levy increase of approximately 2.07% that is due to the restrictions placed on local governments by Levy Limits. The projection shows that this will not be sufficient to cover future operating costs and it will force the Village to find ways to increase revenues, find alternative revenues or cut costs. The annual budget process is used to accomplish this task. A ten-year projection of the Village's General and Library funds future revenues and expenditures is included (see [Table 6](#) and [Table 7](#)). Specific assumptions as to rates of increase or decrease in revenues and expenditures can be found in [Table 5](#) and are detailed further within [Appendix A](#). The following is an overview and summary of these assumptions.

Operating Revenues

To reflect the trend experienced by most local governments today, non-tax levy revenues were generally projected to remain flat at their 2022 budgeted levels. Non-tax levy revenue sources available for general operations for purposes of this analysis are projected to remain at 2022 budgeted levels for the next ten years. With the assumption that non-levy revenues will remain flat, the assumption would be that the tax levy would balance the budget. However, levy limits does not allow for this to occur, so balancing the budget will rather fall to curtailing expenditures/services, finding additional revenues, or additional growth and development that can absorb future levy shortfalls.

Operating Expenditures

While non-tax levy sources of revenue for most communities have remained stagnant, expenditures have not. Increases in the cost of employee health insurance and increase in the cost of commodities such as fuel and salt have significantly outpaced inflation. [Table 5](#) reflects the assumptions used in projecting operating expenses. In cases where the forecasting code was not able to account for one-time blips in the forecast, the individual line items are adjusted by a specific percentage or manually adjusted for a certain dollar amount.

On average, Village expenditures for operations are expected to increase by an average of 3.49%, or \$283,770 and \$43,989 for the General Fund and Library Fund, respectively, annually for the next ten years. Since expenditures are projected to increase at a faster rate than sources of non-tax levy revenue and increases in the Village's tax levy is restricted to net new construction, the General Fund shows an annual deficit in each of the projected years of the plan. [Table 6](#) and [Table 7](#) show the projection of the General Fund and Library Fund, respectively, for revenues and expenditures. The chart further

demonstrates the percentage increase in the property tax levy. For purposes of this study, potential additional operating costs related to the construction of the new Library have not been included at this time.

Levy limits are very restrictive and do not allow for any inflationary changes to operating costs. As shown in the projections, the levy is not sufficient to cover the shortfall in non-levy revenues and produces annual deficits. The Village is projected to increase its levy from 2022 levels by an assumed 2.00% or Net New Construction (NNC). NNC is defined as new construction reduced by any demolition in the Village. The assessor reports this amount to the Department of Revenue (DOR) annually. In addition to NNC, TID closures also help to increase the levy limit. However, no TID closures are projected to occur within the projection period. The current model demonstrates compliance with the levy limit calculation. Pressure from compliance with levy limits is demonstrated on the General Fund and Library projections where annual deficits can be noted for all years of the projection period.

Table 5
Operating Fund Forecast Codes

CODE	DEFINITION	EXPLANATION	% INCREASE
A	Average	Sets the value in all five years of the forecast period to the average of the prior five year's values.	
C	Commodities	Operating supplies	5.00%
E	Employee Finges	Dental, life, and disability insurance	6.00%
G	Gas & Oil	Motor Fuel	5.00%
H	Health Insurance	Health insurance	8.00%
I	Insurance	Property, Liability, Worker's Compensation	3.00%
L	Last	Sets the value in all five years of the forecast period to the value in the most recent budget or actual column.	
M	Manual	Manual Entry	
S	Services	Professional services, training & travel, dues and subscriptions	3.00%
U	Utilities	Utilities - Water, Sewer, Electric, Telecommunications	3.00%
W	Wages	Salaries, Wages, payroll taxes, retirement	3.00%
W2	Police Wages	Police - Salaries, Wages, payroll taxes, retirement	3.00%
Z	Zero	Sets the value in the forecast period to zero.

Fund Balance – General Fund

As discussed earlier regarding rating factors, the Village has a healthy Unassigned Fund Balance, rated Aaa in the most recent Moody’s credit report. The Village has established a policy to maintain Unassigned Fund Balance at 25% - 35% of General Fund expenditures. This is consistent with external organizations such as the Governmental Finance Officers Associations (GFOA) recommendation that at a minimum, governments, regardless of size, maintain unrestricted budgetary fund balance in their general fund of no less than two months of regular general fund operating revenues or regular general fund operating expenditures (GFOA’s Executive Board: September 2015). In addition, it is the Village practice is to transfer excess funds above the fund balance policy to the other Village funds to cash finance certain projects or costs. **Table 6** also shows the estimated fund balance policy percentage. For the projection period, due to levy limits holding the tax levy to 2% increases and creating deficits the fund balance will not be able to stay in compliance with the Fund Balance policy and will be in deficit from 2027 - 2032 of the projection period. The annual budget process will address how the Village will maintain a balanced budget and stay in compliance with the Fund Balance policy.

Table 8 demonstrates the Village’s projected fund balance over the projection period based upon the operating projection.

Table 8
General Fund - Fund Balance Forecast

Another Moody’s rating factor (currently rated Aa2) gauges the trend in fund balance. Village staff are aware of this factor and should consider transferring out an amount to Capital Projects that provides for an increase in the fund balance. Maintaining a positive trend for the unassigned fund balance will assist the Village with maintaining or increasing this rating factor.

Currently, the largest component of the General Fund fund balance is the unassigned category. There is a portion, approximately \$156,000, that is categorized as “Nonspendable.” This represents a combination of advances to other funds and prepaid items. The nonspendable category demonstrates fund balance that cannot be used to fund operations as the cash associated with the balance has already been spent. The Village has been careful through the years to avoid advances to the TIF districts. Advances often catch the attention of rating agencies and are looked upon as a negative draw on the General Fund.

4.3 Capital Finance Plan

The Village’s Capital Improvement Plan (CIP) identifies total project costs of \$85.48 million. \$52.27 million to be financed with General Obligation (GO) debt for the 2023 - 2032 planning period.

Project funding mechanisms were chosen based on their service life, project amount and ability for the applicable fund to cash finance projects. The capital plan includes many large projects that may be funded with either General Obligation debt or Utility Revenue debt. While developing the forecast, pressure was noticed when trying to fund debt funded projects with all General Obligation. More specifically, the pressure on the General Obligation debt limit. Because of the pressure, many Utility projects included in the CIP over the next 10 years are recommended to be funded with Revenue debt. The remainder of the projects will be funded by levy support through GO Notes or Bonds.

Appendix B provides a detail list of the projects and the recommended funding source. **Table 9** provides a summary of the project costs funded by GO Notes or Bonds and determines the size of the potential borrowing by year.

As discussed above, when looking to fund projects, the GO Debt Limit needs to be considered. Although the Village has residual capacity under the debt limit future funding pledged on a GO basis, the Village should look to leave capacity for emergency funding. **Table 10** below depicts the Village’s current and projected percentage of its debt limit and the residual capacity and potential self-imposed debt limit policies options. Once the Village determines a debt limit policy, it should be used in the determination of future projects to undertake.

Another consideration when developing a capital/debt plan is the impact on the tax rate. The Village has included some significant building, street and park projects within the CIP plan. The plan shows that currently the debt service tax rate may need to be stepped up each year to get to a tax rate of \$3.45 per thousand of equalized valuation to fit the projects contemplated in the CIP (see **Table 11 and Table 12**). We recommend that if the Village consider adopting a debt tax rate or debt tax levy policy that assists the Village

Board with making decisions regarding taking on large facility projects. A reasonable debt tax policy will guide the decision-making process by showing the pressure points from taking on projects at certain points in time.

The final debt policy that many communities adopt relates to the percentage of debt service expenditures compared to total levy related fund total expenditures. For 2022, the Village had \$1,993,826 in debt service fund debt payment expenditures. Using the General Fund, Library Fund and Debt Service expenditures totaling \$9,901,224, the Village currently has a 20.14% ratio (2021 = 15%) for this potential policy. Using the same funds, as shown in this plan, it is estimated that this ratio would be between 25% and 39% during the projection period. Other communities with similar polices have a cap of 30%.

NOTES - Growth is projected at a conservative 2%. The Village has averaged 7.86% growth over the last 5 years.
 - Stabilized the tax rate by stepping up to \$3.45 per thousand of equalized tax rate from 2028 through 2031. At that point, stabilize at that level until projects return to more routine.
 - Growth rates above the projected 2% will provide the Village more flexibility.
 - Red boxed area represents the 10 year project impact period.

Table 12

SECTION 5 – PROJECTED PROPERTY TAX IMPACTS

The concluding exercise of the Ten-Year Financial Management planning process is a projection of the tax levy, and corresponding tax rates, for all levy supported purposes: Village operations, capital outlay and debt service.

Development of the forecasts discussed in the previous sections allows for a projection of the future tax levy and corresponding tax rates needed to support Village's operations, capital, and debt service. Since 2005, the amount by which the Village is permitted to increase its tax levy has been limited by State law. The current version of State levy limits allows the Village to increase its levy over the preceding year's actual levy by a percentage equal to its prior year net new construction increase. Additionally, any amounts needed to pay General Obligation debt service authorized after July 1, 2005 is exempted from the limits. Because the Village has not historically utilized the full adjustment to increase its levy for its general obligation debt, the Village has had adequate capacity under the current levy limit law to support the levy requirements. The current ten-year projection shows pressure points that the Village will need to address.

The Village's total levy is comprised of the General Fund, Library, Sick Leave, TID Levy Support and Debt Service Fund. **Table 13** includes the Village's projected tax levy and tax rate from 2022 - 2032.

Table 13

Year		Operations		Library		Sick Leave		TID Levy Support		Existing Debt		New Debt		Total	
2022	\$ 4,732,991	\$ 3.43	\$ 716,138	\$ 0.52	\$ 10,000	\$ 0.01	376,267	\$ 0.27	\$ 1,794,628	\$ 1.57	\$ 0	\$ 0	\$ 7,630,024	\$ 5.54

Property Tax Levy

Property Tax Rate

Table 14 depicts a levy limit compliance check. The detail levy limit calculation can be found in **Appendix B**. The levy limit calculation only allows the Village to increase taxes by net new construction. Levy limit compliance is driven largely by permitted adjustments for debt service and net new construction. For this study, net new construction is limited to 2%. All of the Village’s General Obligation debt service is exempted from levy limits. Ehlers generally advises communities to claim the “net levy” amount of debt service, since post July 1, 2005 G.O. debt service adjustments are subtracted out the following year on the levy limit form. Based upon the methodology used in the model, the Village is projected to remain in compliance with levy limits during the planning period. Pressure on the Village’s operations calculating the Village to be in compliance creates operating deficits in both the General Fund and Library Fund, See **Table 6** and **Table 7**.

Table 14

SECTION 6 – TIF DISTRICTS & ECONOMIC DEVELOPMENT

Updates to the cash flow projections for each Tax Incremental Finance (“TIF”) District were prepared to monitor the performance of each TID.

TID No. 3

TID Type: Blighted Area
Expenditure Period Ends: August 16, 2027
Maximum Life Ends: August 16, 2032
Final Revenue Collection year: 2033

Currently projected to close within statutory life, without any extensions. However, the Village has provided tax levy support and the standard and technical college extensions would allow the Village to extend the life of the District 6 years to help collect some of this past support.

Appendix D includes an update to the TID increment projections for TID No. 3 and a cash flow projection. TID No. 3 is presently paying a portion of the debt service on several outstanding G.O. Notes and Bonds issues. Based upon the development assumptions, the district should be able to pay the GO debt issues in 2028. However, the District would need to remain open through the full life of the District plus a 6-year extension to repay the tax levy support. Even with the extension, the repayment will fall short by \$546,732.

TID No. 4

TID Type: Rehabilitation or Conservation District
Expenditure Period Ends: September 15, 2030
Maximum Life Ends: September 15, 2041
Final Revenue Collection year: 2042

The District was extended by 6 years during 2020 to assist with development incentives related to a low-income housing tax credit development (LIHTC).

Appendix E includes an update to the TID increment projections for TID No. 4 and a cash flow projection. TID No. 4 is presently paying a portion of the debt service on several outstanding GO Notes and Bonds, a 2017 State Trust Fund Loan as well as development Municipal Revenue Obligations (MRO). Based upon the development assumptions, the district should be able to meet all its obligations and close in 2040.

TID No. 5

TID Type: Rehabilitation or Conservation District

Expenditure Period Ends: August 7, 2039

Maximum Life Ends: August 7, 2044

Final Revenue Collection year: 2045

Currently projected to close within statutory life, without any extensions.

Appendix F includes an update to the TID increment projections for TID No. 5 and a cash flow projection. TID No. 5 is presently paying a portion of the debt service on several outstanding GO Notes and Bonds, as well as development Municipal Revenue Obligations (MRO). Based upon the development assumptions, the district should be able to meet all its obligations and close in 2036.

Economic Development Initiatives

The Village has continued to promote development and redevelopment in and outside of its tax increment districts. This helps, as Net New Construction within the tax increment district will help support the recovery on TIF obligations, reducing any required support from the Village as well as providing the ability for the districts to close sooner. Net New Construction also provides for growth in the tax base and allows for increases in the Village's levy limit.

SECTION 7 – GENERAL CONCLUSIONS & OBSERVATIONS

The following is a summary of key conclusions and observations developed as a result of the modeling and workshop process and the development of the Financial Management Plan:

- Current favorable indicators for the Village are strong tax base growth, wealthy tax base and solid operating reserves. The Village has an elevated debt burden, but this is due to the number of projects it has undertaken and will take on in the future.

The primary challenges going forward will be:

- Finding the appropriate balance between a desire to keep taxes manageable and provide updated facilities to a growing community. The Village has several building projects, street projects and park projects that drive a significant CIP.
- Maintaining and improving revenue sources to abate the property tax levy from debt service including TIF revenues. Funding sources for Utility projects could become an issue as the Village strives to preserve the General Obligation debt capacity. Last year's plan recommended using Utility Revenue Bonds for Utility projects to address this concern. The Village implemented this recommendation in 2022.

Levy limits, in their present form, are expected to be a constraining factor for the Village. Items such as inflation and additional costs to run new Village facilities will impact the levy limit calculation starting in 2023. To address this concern, the Village will need to use the annual budget process to find ways to stay within the levy limit. If smaller adjustments cannot alleviate the pressure, the Village may need to look to available alternative revenues, cutting or reallocating costs or reduction of services. Planning for this possibility is something the Village should consider now before the Village exceeds the levy limit.

Qualifying for the Expenditure Restraint Program (ERP) payments may be a constraining factor. To qualify for ERP payments, the Village must limit increases in its annual general fund expenditures to a percentage that does not exceed the sum of 60% of its Net New Construction factor plus an inflationary adjustment based on the Consumer Price Index. The Village did qualify for an ERP payment in 2023. Currently, with the budget increases projected, as discussed in section 4.2, the Village appears to be able to qualify for ERP payments for the planning period 2024 – 2032. However, new facility operating costs may lead to years where the Village does not qualify.

Closure of TIDs can have a positive impact on the Village's financial position by increasing the Village's tax base. This additional tax base allows the Village to increase its tax levy, reduce its tax rate, or likely some combination of both (levy limit legislation, if still in effect, may restrict or limit the Village's options in this regard). Since the projected TID

closure dates are beyond the ten-year planning timeframe of the model, the impact is not reflected in the projections.

SECTION 8 – RECOMMENDATIONS

To capitalize on its investment in this planning process, the Village should undertake or review the following actions as extensions of this plan:

1. Consider approving additional financial policies:
 - a. Debt policies – these policies will drive the CIP process.
 - i. Debt service tax rate or debt tax levy that will control when the Village is fiscally capable of taking on large facility projects.
 - ii. Debt capacity should not exceed a certain percentage of the Village’s statutory debt limit. We recommend considering a not to exceed self-imposed debt capacity percentage between 60% and 70%.
 - iii. Debt expenditures should not exceed 30% of the expenditures of all levied fund expenditures.
 - b. Fund Balance policies
 - i. Annually review the approved General Fund Balance policy that calls for maintaining the unassigned fund balance within a range of 25% to 35% of operating expenditures.
 - ii. Consider amending the fund balance policy to address excess fund balance above the policy. The policy should state that allowing for use of excess fund balance to fund one-time operating items, transfers to capital projects to fund additional projects or transfers to capital projects to reduce future borrowings is acceptable. The policy should also state that excess fund balance should not be used to fund operations.
 - c. Revenue policies
 - i. Qualify for Expenditure Restraint (ERP) when possible.
 - ii. Consider alternative revenues if there is pressure on Levy Limits or ERP calculations.

In addition, we recommend that the Village continue to update its CIP annually, so it maintains a planning horizon, and accurately reflects planned projects and associated costs. Maintaining a current CIP also allows this information to be integrated into a current year financing plan, making for an easy transition into the current year’s debt issue(s) process.

Review status of financial rating indicators in conjunction with future debt financings. As new debt issues are considered, their impact should be evaluated to see what impact the new issue will have on the bond rating.

FINANCIAL MANAGEMENT PLANNING

Consider additional periodic updates to this Ten-Year Financial Management Plan. Changes in economic conditions, local priorities, state legislation and other variables may require that the model be updated periodically to remain a viable planning tool. The chart below reflects a typical fiscal planning cycle.

SECTION 9 - ACKNOWLEDGEMENTS

On behalf of the project team, we would like to acknowledge the commitment and contributions provided by several members of Village staff in completing this project. We would like to recognize Martin Shanks, Village Administrator and Lisa Novinska, Finance Director for their input and guidance throughout the course of this study.

2 Furnaces & 2 A/C's

Description

Description of work

We propose to replace the 2 existing HVAC systems on the police station side of the building. The new equipment will be installed in the same location as the existing equipment. We will reconnect to the existing pvc venting, gas and electrical. The old equipment will be removed and recycled. All necessary sheet metal alterations will be fabricated. New ECO-BEE WI-FI thermostats will be installed as well as 4" filter cabinets. The new equipment will carry a commercial 1-year part and labor warranty. After completion the new equipment will be properly started and tested.

Comfortmaker Performance Series N95 ESN 100K Gas Furnace Replacement with ECO-BEE WI-FI Thermostat

Comfortmaker Performance Series N95 ESN 100K Gas Furnace (2120)

- Up to 96% AFUE heating efficiency
 - Multi-speed ECM fan motor
 - Lifetime heat exchanger limited warranty
 - 10-year parts limited warranty
 - 1 Year Labor Warranty
- N95ESN1002120A

- T805 Thermostat
- 7 Day or 5/1/1 programmable
- Auto Changeover
- Easy menu driven programming
- Intuitive wake, leave, return, sleep programming icons
- 8 sq. inch display
- Blue backlight
- Glow in the dark light button
- Programmable fan
- Electric or Gas configurable
- Room temperature calibration adjustment

Separate heating and cooling swing (cycle rate) adjustments
Keypad lockout
Heating and cooling setpoint limits
5 minute compressor delay protection (selectable on or off)
Filter change indicator(selectable on or off)
Simple private label badge system
Easy wire color coded terminal blocks
Universal sub-base
Mounts on wall or junction box
Battery or 24v power
5 year warranty
